

A Conversation Starter for OUR Future Together on Loop Head Peninsula

A grass roots initiative supported by local
community groups

at a very early stage and open to everyone

Join a Conversation for OUR Future Together on Loop Head *Your Peninsula NEEDS YOU!*

**Your passion ... Your ideas ...
and your love of community.**

With a declining population from Moyasta to Kilkee to Kilbaha, schools closing, clubs crying out for players, businesses needing support and people leaving the area due to lack of jobs, we – the residents of the Loop Head Peninsula – are joining to collaborate on a peninsula-wide development plan that will see us all thrive here, into the future.

The Loop Head Peninsula has a lot of hard-working groups and local development committees already, who are forever driving projects forward within their local communities.

What we would like to do is to create a STEERING BODY for all these local groups and individuals to feed into, to include community, agriculture, sports, culture, business, etc.; with most importantly YOU the RESIDENTS in the lead. Partnering with all who have a passion for the Loop Head area.

Collaborating TOGETHER on a wide level will allow us to plan and act for our future on the peninsula.

DON'T WORRY, you don't have to be on a committee (unless you want to!) but your ideas and your passion, your love of the Loop Head area and your desire to live and work here are what is most valuable right now.

Have your voice heard – your input is part of our future!

If you are supportive of a wide-ranging 'Loop Head Peninsula Development Plan', please keep reading and take action at the end of page 4.

- The Loop Head community is faced with many economic and community challenges. These have a significant impact not only on our day to day reality but also into the future. These impact how we feel about our future here, and how we feel valued. **A question is, how can each of us reach our full potential on the Loop?**
- Covid19 has shown the depth of our community, and its resilience. To capture the journey ahead, we are starting the conversation to co-create the Loop Head Peninsula Development Plan (LPDP). Where we call a spade a spade and listen to each other to understand our priorities. **What will our future look like?**
- An outcome of this conversation may be the people of our communities coming together to form a local decision making partnership to catalyse our development. **What are our steps to the future?**
- This four-pager is a heads up before we start this conversation. We know from past experience that this will not be very easy. All and every input will help. **How will you take part and get your voice heard?**

Other questions we will meet...

...Why bother?

- 1 Get to know what each one of us are thinking about how we can best work together and where we can support each other.

...What is priority?

- 2 Agree where we should create focused teams to deliver on the goals as we clarify them.

...How do we get there?

- 3 Create a road map now to build our future together.
